SUMMARY

Detail-oriented System Analyst & MERN Developer with a strong foundation in SDLC/Agile and full-stack architecture. Proven ability to analyze complex user requirements and transform them into actionable functional documents and scalable code. Skilled in JavaScript (MongoDB, Express, React, Node.js), SQL querying, and API validation (Postman). Focused on ensuring system integrity through rigorous requirement traceability, stakeholder alignment, and technical problem-solving. Currently contributing to high-quality software delivery at Camerin Innovates.

EDUCATION

MCA (Master of Computer Applications)
College Of Engineering Chengannur (CEC), Kerala Technological University (KTU) | 2023 - 2025 | CGPA: 7.91

Bcom (Computer and Taxation)
Kristu Jyoti College of Management and Technology (KCMT), Mahatma Gandhi University (MGU) | 2020 - 2023 | CGPA: 7.22

SKILLS

- **Full-Stack Development:** MERN Stack (MongoDB, Express.js, React, Node.js), JavaScript (ES6+), HTML5, CSS3.
- **Database & Data Analysis:** SQL (Relational Databases), NoSQL (MongoDB), Data Modeling, and Reporting.
- **Backend & API: RESTful API Development** & Validation (Postman), System Integration, Middleware Logic.
- **Architecture & Management: SDLC/Agile** Methodologies, System Design, JIRA, Requirement Traceability (RTM).
- **DevOps & Tools: Git** (Version Control), Web Hosting & Deployment, **Selenium.**

PROJECTS

Personal Finance Manager (MERN) | Dec 2024 - April 2025, *Tools Used: React, Node.js, Express.js.*

- Developed a comprehensive finance tracking application featuring a dynamic dashboard for intuitive income and expense management.
- Designed specialized features, including a Smart Finance Guide and an EMI Calculator, to assist users in efficiently managing loans.
- Streamlined budget planning capabilities, allowing users to track spending 20% faster and resulting in a 15% increase in daily active users.

Church Information Portal (Freelance work) | June 2025, *Html, Css, Javascript, React.js, MongoDB.*

- Designed an intuitive and visually engaging user interface for a church information portal, prioritizing user experience and responsive modern web standards.
- Developed the robust frontend architecture using React, seamlessly integrating it within the full MERN stack to deliver a scalable web application.
- Managed the end-to-end freelance development cycle, successfully translating project requirements into a functional and polished digital platform.

Sip Trunking (Website) | Sept 2025 - Dec 2025, *Tools Used: MongoDB, Express.js, React, Node.js.*

- Engineered a specialized documentation website to effectively communicate the complexities of SIP trunking within VoIP systems.
- Improved user comprehension by integrating detailed animations that illustrate call flows, configuration processes, and real-world usage scenarios.

CERTIFICATION

- NPTEL Certificate For Cloud Computing -MOOC Course (2024)
- Camerin Indian institute of upskill Software Testing Intership Certification.(2026)
- Infosys Springboard and Camerin indian school of upskills software testing Certificate. (2025)
- Nss Volunteer Certificate in MG University (2020)
- EY Edunet Employment Full Stack development in MERN Stack Certificate. (2025)

Professional Experience

Freelance Web Developer | Independent | Jan 2025 – Dec 2025

- Managed the end-to-end data architecture and UI development for a robust digital information portal.
- Ensured 100% compliance with modern web standards and client requirements, translating complex project needs into a functional, highly accurate database system.

VoIP Network Engineer Intern | Comstream Technologies | Sept 2025 – Dec 2025

- Analyzed complex communication data streams and engineered specialized documentation to communicate system configurations effectively.
- Improved user comprehension by breaking down complex processes into easily understandable, documented workflows.

Quality Assurance & Testing Intern | Camerin Indian Institute of Upskill | Jan 2026 – Present

- Conducted rigorous data verification and back-end functionality testing, ensuring seamless data integration and identifying 15+ critical vulnerabilities before production.
- Followed strict testing SOPs to author and execute 100+ comprehensive manual test cases, accurately documenting reproducible steps and expected outcomes.
- Collaborated closely with QA supervisors to address data inconsistencies and system defects, maintaining a 98% bug-free environment and ensuring maximum productivity.
- Utilized automated scripts to reduce manual verification effort by 35%, demonstrating an ability to process large volumes of data efficiently while maintaining quality.
